🎓 PhD Opportunities in Game Theory at LSE

The Department of Mathematics at the London School of Economics is inviting applications for its PhD programme in Mathematical Game Theory.

🇬🇧 Successful applicants will receive competitive funding including full tuition coverage and will join a dynamic research community in the vibrant heart of London. LSE offers a unique environment with close links to economics, social sciences, and computer science, making it an ideal place to study game theory in all its dimensions.

🎲 Our research areas include:

- Algorithmic and Computational Game Theory

- Information Asymmetries in Games

- Multiagent Learning and Adaptive Dynamics

<div align="center">More on our group</div>

💡 Funding opportunities:

- LSE funding open to all topics in Game Theory

<div align="center">⏰ Deadline: 14th January 2026</div>

- ERC/UKRI Grant funding from Olivier Gossner's project on Games of Incomplete Information and Hierarchies of Beliefs

<div align="center">⏰ Applications accepted on a rolling basis</div>

📧 For either type of funding

<div align="center">Scientific contact: Olivier Gossner</div>
